

**FEEL CONFIDENT THAT WE CAN**  
EXECUTE ON THE POWER OF YOUR IDEAS

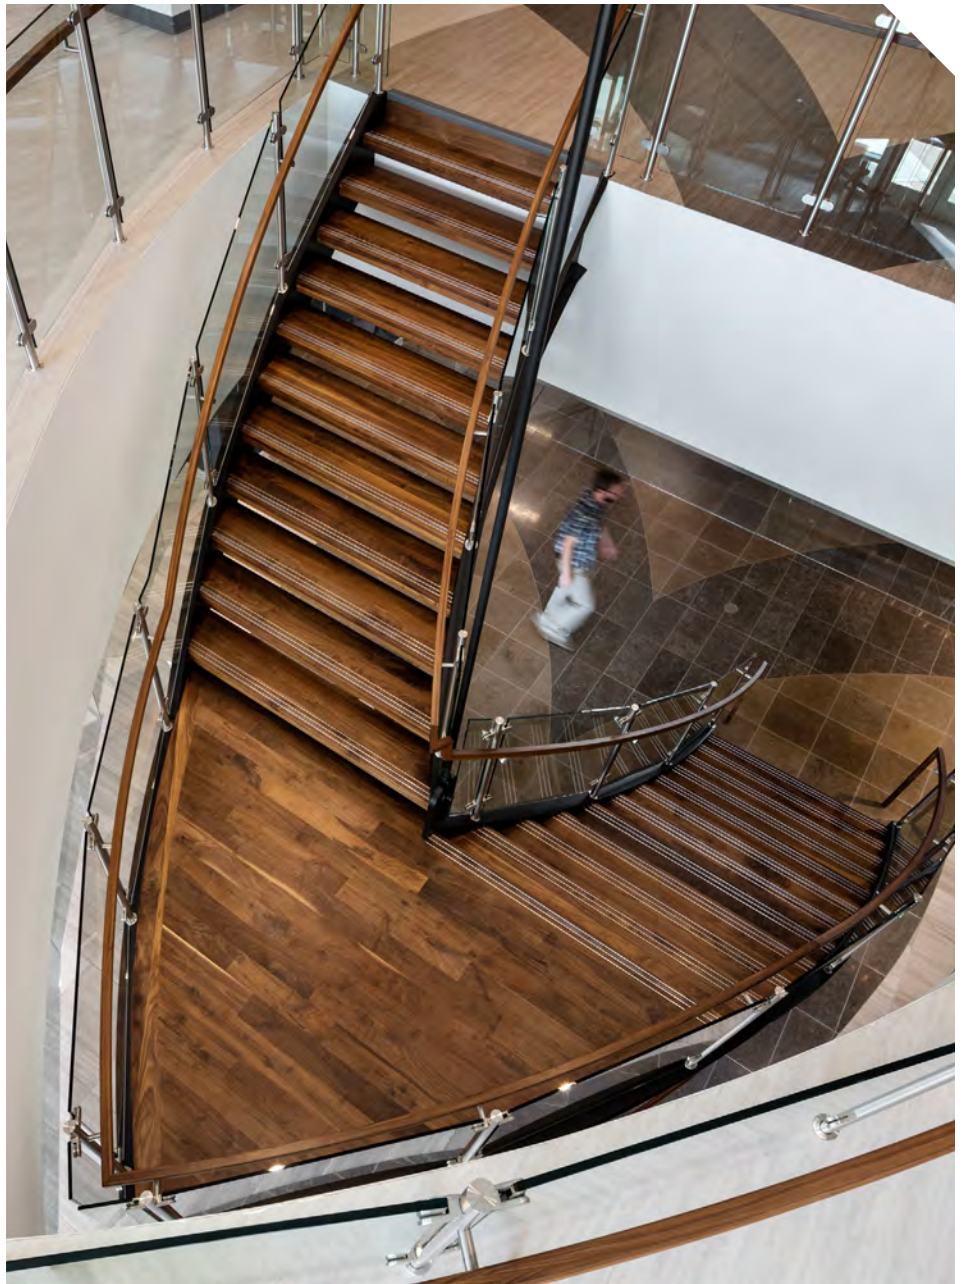

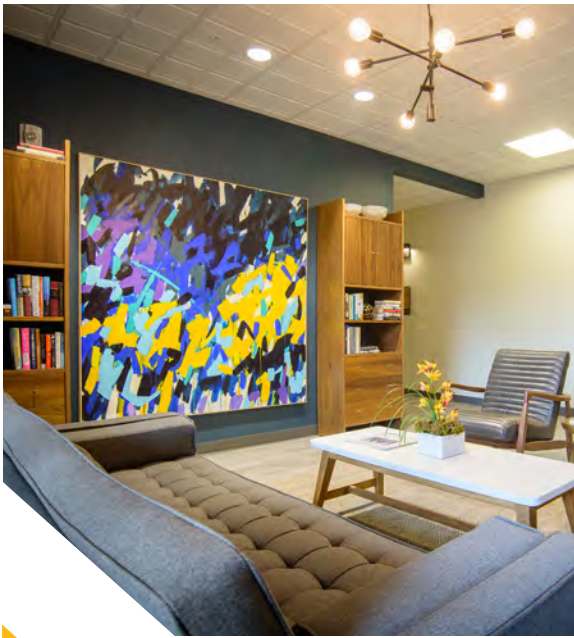

# WELCOME TO BRINKMAN CONSTRUCTION

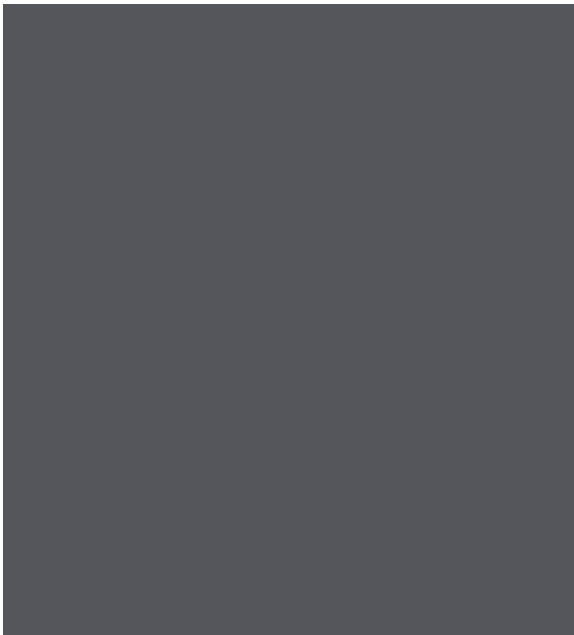

## WHAT DOES IT TAKE TO CONSTRUCT A BUILDING OF DISTINCTION?

*Strength, endurance, and patience* are at the foundation. At Brinkman Construction, we distinguish ourselves by truly taking ownership of our projects, while relying on our grit to complete them. As your advocate we identify risk and communicate with honesty and transparency, to build expectations you can depend on. We build on the trust that is placed in us with a forward-thinking approach that aims to turn adversity into opportunity.

# ABOUT US

We're driven to build. And we've been doing it successfully along the Front Range since 2005. Our portfolio includes everything from tenant finishes to large-scale ground-up construction and everything in between. We've been fortunate to work with companies across diverse industries, including multi-family, senior living, memory care, healthcare, hospitality, office, and industrial. It's our culture to make the right decisions by you. Always. It's how we deliver value beyond the building.

# DELIVERING VALUE BEYOND THE BUILDING

## QUALITY – PREDICTABILITY - INNOVATION

We bring value beyond the building. Our operational differentiators provide clients with predictability in schedules, budgets, quality, and outcomes.

### QUALITY

Our attention to detail ensures the delivery of the highest-quality building. We engage the most qualified subcontractor partners for each project and manage quality to the highest standard.

### PREDICTABILITY

Our team has the ability to truly think like an owner and have a greater awareness of the holistic impacts developers face within a project, outside of just construction. We know the importance of providing clients with predictability and supporting them with risk mitigation.

### INNOVATION

We lead through innovation. We focus on being creative to ensure our clients don't have to compromise their vision or how a space impacts the long-term value of their operations.

# OUR APPROACH

Specific programming is unique to every project. Ensuring programming meets a client's vision, operational needs, and budget, requires a collaborative approach. We engage early to work with a client to define the full scope of a project. This collaboration allows clients to put real numbers to their programming and design to a budget. This process minimizes design rework, helps streamline the entitlement process, and creates overall efficiency in project start and completion.

# OUR TEAM

**PETE MEYER**  
VP of Business Development
